
Of the many high-profile scandals that have besmirched college athletics in recent years—including those involving Heisman trophy recipients, head coaches, and many players at Penn State University—arguably the one that provoked universal condemnation was at the University of North Carolina, Chapel Hill. At one of the nation’s most respected public universities, players, faculty, and administrators engaged in wholesale academic fraud—fake courses, plagiarism, and grade tampering. In Cheated, UNC history professor Jay Smith and former UNC athletic administrator Mary Willingham chronicle the widespread use of, and institutional attempts to cover up, a litany of shameful activities on that campus, all designed to preserve and protect the university’s programs and revenues in football and men’s basketball. In a thorough, chilling, well-documented, step-by-step account—from recruitment and admissions to the daily care and feeding to student advising and the complicity of faculty, the athletic department, and coaching staff—the authors meticulously lay out the patterns of systemic corruption and lack of institutional control. This book should be required reading for everyone, both those on campus and fans in the stands or in front of their flat-screens. Summing Up: Essential. All readers.
